Product use

Liberon Brass and Copper Cleaner is a mild-acid based cleaner that removes heavy tarnish from un-lacquered copper, brass and bronze. It helps to de-grease as it cleans and can be buffed to a bright shine.

Application

Shake well. Rub item to be cleaned with a soft cloth soaked in Brass and Copper Cleaner, removing all traces of tarnishing. For very stubborn stains use with Liberon Ultra Fine Steel Wool (0000). Rinse well and dry with a clean soft cloth.

Maintain with Liberon Brass and Copper Polish. To retard tarnishing rise with warm soapy water after polishing, then wax the cleaned and dry surface with Liberon Black Bison Paste Wax (clear) to form a protective coat.

Brass and Copper Cleaner may also be used on pewter to maintain a silver effect. Allow to dry before buffing with a clean soft cloth.

Important: Always test product on a spare surface or inconspicuous area for colour, compatibility and end result. Extra care must be taken when using on brass or copper plating.

Packaging

Brass and Copper Cleaner is available in 125 ml and 500 ml containers.

Health and Safety

Flammable – contains acid. Keep out of the reach of children. Avoid contact with skin and eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed seek medical advice immediately and show this container of label. Contains silica. Avoid breathing dust when buffing.
