Product use

Liberon Brass and Copper Polish is a water based polish that cleans, polishes and reduces tarnishing of brass and copper in one application.

Application

Shake well. Apply generously with a soft cloth, rubbing hard. Buff off after a few minutes with a clean soft cloth. If the metal is heavily tarnished, clean first with Liberon Brass and Copper Cleaner.

To retard tarnishing rinse with warm soapy water after polishing. For improved protection, especially on decorative items, coat the cleaned and polished metal with either Liberon Jade Oil or Liberon Black Bison Paste Wax (clear) to form a protective coat.

Important: Always test product on a spare surface or inconspicuous area for colour, compatibility and end result. Extra care must be taken when using on brass or copper plated items as thin plating may be removed.

Packaging

Brass and Copper Polish is available in 125 ml containers.

Health and Safety

Keep out of the reach of children. Do not empty into drains. Use only in well-ventilated areas.
